

**LEED Certification Recycling
Information**

At Canyon Stone, we are doing our part to protect the environment and we are committed to assisting you in obtaining LEED points. We strive to do everything that we can, to protect the community and the environment. With our 50 year warranty, Canyon Stone Veneer products are a high quality product that is maintenance free, and requires little to no care to maintain its beautiful timeless look.

LEED Points 1-2

Materials & Resources Credit 5.1 & 5.2 Material Extracted, Processed & Manufactured Regionally:

At Canyon Stone 100% of all material are either Manufactured or extracted within a 500-mile radius of our plants. With manufacturing plants both in the Midwest and on the East Coast, we can assist you in obtaining these credits. Other companies may have distributors within the 500 mile requirement but as it states, it must be manufactured within 500 miles of the project site.

LEED Points 2-10

Energy & Atmosphere Credit 1: Optimize Energy Performance:

The LEED Intent is to achieve increasing levels of energy performance beyond the prerequisite standard to reduce environmental and economic impacts associated with excessive energy use. Canyon Stone products can contribute to the overall efficiency of exterior walls. Also in 2013, both manufacturing facilities converted all production lighting to highly efficient LED fixtures reducing our energy consumption over 50%.

LEED Points 1-2:

Materials & Resources Credit 2.1 & 2.2: Construction Waste Management

In an effort to protect our environment, Canyon Stone is very committed to using recycled products and recycling the majority of our waste. We create very little waste and what waste we do create is diverted from landfills and is used as construction fill.

All of our shipping materials are made from recycled items. The cardboard pallet wrap that we use is made of 100% recycled materials. In addition, we purchase recycled pallets and upon request, we would be happy to pick up our pallets from the job site so we can reuse them again.

In addition to the LEED information above, here are some of the other ways Canyon Stone is helping the environment.

To help conserve water and energy, Canyon Stone collects rain and snow run off from our 80,000 square foot building and re-use it in our manufacturing process.
